## Our Installation Team's

Here at Thistle Steel, we complete the job from the very start all the way through. We ensure that our A+ Rated buildings are combined with an unmatched level of Installation quality.

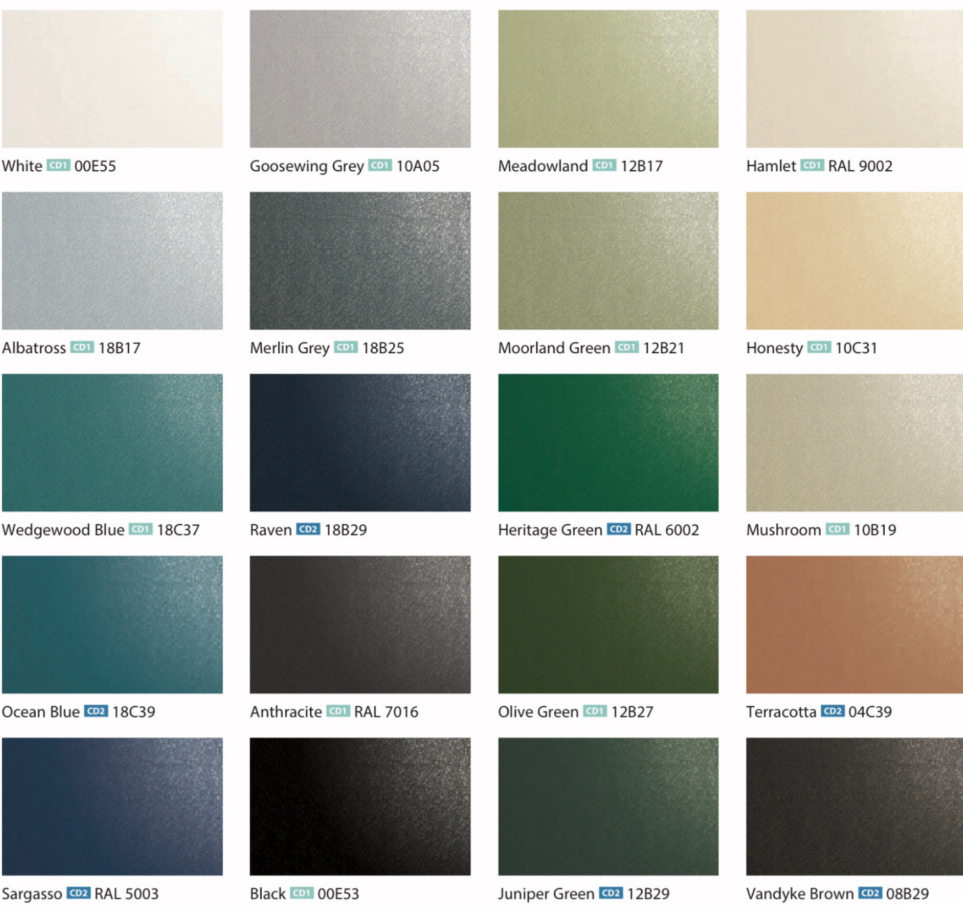

There's no point buying a top quality Steel Building if the Construction process isn't matched.

We carefully monitor the process from first contact all the way through to the building being signed off to ensure quality control. Looking to erect the building yourself? We also offer a top quality Self Build Assistance Program to help you through.

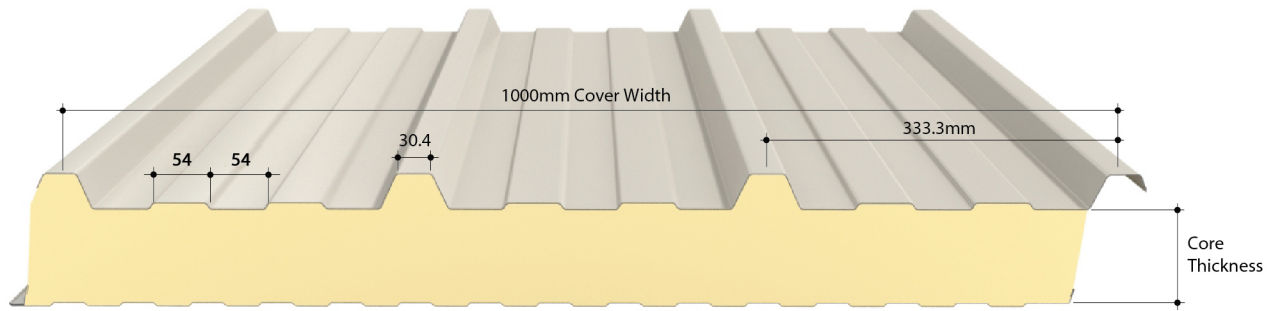

# Single Skin Cladding

Our Single Skin Steel Cladding is suitable for a wide range of buildings and situations from warehousing and industrial applications to agricultural and home outbuilding uses. Available in 0.5mm and 0.7mm thicknesses in both box profiles and corrugated we have a profile to suit all situations. Manufactured to the highest quality standards, our roof and wall systems utilise premium pre-coated rolled steel sheets. All our cladding also comes with a fantastic 25 Year Guarantee.

**+ MANY MORE OPTIONS!**

# Insulated composite panels

The external face has clean, sharp lines and panels are available in an extensive range of finishes and colours, enabling designers to create modern, visually-engaging buildings. Attractive and durable, they are used in a wider range of sectors including industrial, retail, office, health, education and leisure. We also match any u-value/Fire resistant requirements.

## Personal access and Roller doors

### P.A Doors

Inward or outward opening, left or right hand hung We offer a range of finishes including timber and steel, single or twin skinned all with a host of opening options for fire exits.

### Roller Doors

Sourced from UK suppliers, we can supply access doors suitable for use in all our building ranges, made to your individual requirements to allow maximum access into your building.
