BUILDINGS**

Think Quality, Think Thistle

Domestic Buildings

Thistle Steel Cold Rolled Buildings are a great robust solution for steel garages for those clients wanting a bit more than an off the shelf sectional garage. Off the shelf garages generally come in set sizes, which does not always suit the clients end requirements.

At Thistle Steel we offer a bespoke solution for clients requiring Steel Garages. Were able to offer any length, width and height. Steel Buildings can also work with our clients to provide the access in and out of the building as required.

This means Thistle Steel can offer a solution, that will not only work as a Garage, but also other applications. Meaning the building can be used to house cars of any size, quantity. Or offer garaging and a workshop/hobby room.

The U.K's most streamlined ordering process

YOUR NEW STEEL BUILDING IN 4 SIMPLE STEPS

QUOTE

We pride our self on our hassle free ordering process, this starts with a quote. Give us some simple details and we will get started.

DESIGN

There will be no hidden surprises as we go, everything is already included, from FREE Structural calculations to FREE Amendments, we are here to help.

APPROVE

Once you are completely satisfied and the steel building meets your requirements we get your building signed off and ordered.

ERECT

When your new Thistle Steel Building gets delivered to site, one of our construction teams will step in and get your building completed and ready for use.
